## State Street/University Parkway Grade Separation

*Client: Harris and Associates*

CHJ PROVIDED CONSTRUCTION SUPPORT SERVICES for the State Street/University Parkway grade separation in the city of San Bernardino. CHJ's role in the project was to provide construction inspection, field materials sampling and testing, laboratory materials testing, and batch plant inspection. The project consisted of the widening of State Street and the construction of a new bridge that will allow traffic to pass over the pre-existing railroad tracks. The bridge will replace the current road and will help free up current gridlock. CHJ performed construction inspection, field materials sampling and testing, laboratory materials testing, and batch plant inspection. ○
